LIA: w46 2025 – w23 2026

About Me

I'm an enthusiastic learner and problem solver with customer support experience, currently studying Java development at ITHS. My iterative mindset fuels continuous improvement, leading me to testing and coding. As the founder of **Java Jams**, a student event focused on collaboration and coding projects, I thrive on challenges. I'm actively seeking a **LIA** internship from *week 46 of 2025* to *week 23 of 2026*, where I can apply my skills in Java development, testing and problem-solving while contributing to meaningful projects. I'm eager to contribute to a dynamic team and make a lasting impression. Let's connect!

Skills & Competencies

Programming Languages: *Java, Python, JavaScript, Bash, CSS & HTML*

Development Environment Tools: *Maven, Docker, Poetry, Pip, HomeBrew*

Testing FrameWorks: *Junit5, PyTest*

Languages: *Swedish, English, Spanish*

Organizational: *Event planning, Agile*

Design & Visuals: *LaTeX, Inkscape, Gimp*

Projects

Project Name: *Group Java Project* **GeoDB**

Description:
The project was a CLI geographic database app using JPA and Hibernate to connect to a MySQL database in Docker. I led meetings, organized the project structure, and managed Git & GitHub policies, ensuring the team stayed on track with Kanban in Trello.

Project Name: *Java Jams*

Description:
A personally driven project to create a community centered around coding, Java Jams was founded and organized by me. I handled public speaking, event planning, and documentation writing as part of the initiative.

Education

IT Högskolan (ITHS)

Fall 2024 – Spring 2026

- ✔Java Programming. Programming Principles
- ✔Database Development. Non-SQL MongoDB and MySQL/SQLite
- ✔Java Tools and Development Environments

  Git, Unit Testing, Code Review and CI&CD with Git Actions

Xplorafory Test

Fall 2023 – Winter 2024

- ✔Learning Test Fundamentals Robot Framework, Agile, Jenkins JIRA, and Req Test

University of Gothenburg

Fall 2006 – Spring 2016

Bachelor of Science with a major

in Molecular Biology (VG), 180 hp

The study evaluated a plate method using scanners to monitor yeast colony growth in four parallel environments. Data analysis and post-processing were streamlined with a self-developed **Python** module, called *Phen-o-links*.

Work Experience

2022-04 - 2023-07
